

Python programming course

Contact person: Ir. Mihai Lefter; email: m.lefter@lumc.nl

Date: once every year (autumn)

Location: LUMC, Leiden

Duration: 4 days

This course is targeted at PhD students, postdocs or anyone willing to learn how to program in Python. Students are assumed to have some experience with programming, but not necessarily in Python, and the UNIX shell. There will be a focus on bioinformatics and programming to support scientific research in general.

The program consists of four mornings with lessons and some assignments to be done in your own time (i.e., during the afternoons).

The course is free of charge for MGC personnel. The course fee for people from outside these institutes are 400 euro
